

Cancel identical residual components

(a) Commit a: reward 8

$$V(a) = 8 + K + 5$$

(b) Commit b: reward 6

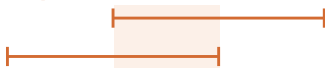

$$V(b) = 6 + K + 2$$

Same vertex set K ; $MWIS(K) \in [20, 30]$

Separate intervals overlap

$V(a)$: [33, 43]

$V(b)$: [28, 38]

$$\Delta = (8 + 5) - (6 + 2) = 5 \rightarrow \text{prefer a}$$

Zero search nodes; common K never queried
