

(a) Ground gap = 0

X: one station

Y: distinct stations

Commit a: **20**

Commit b: **26**

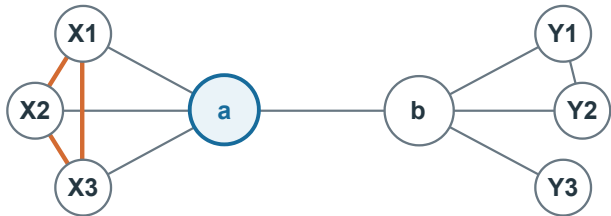

Base alias: $\varphi_0(a) = \varphi_0(b)$

Nine inputs, including resource-gap scalars

(b) Ground gap = 4

X: one station

Y: distinct stations

Commit a: **20**

Commit b: **14**

Missing statistic: edges inside $N(v)$

Before: $a = 0$, $b = 1$ | After: $a = 3$, $b = 1$
